# Lecterns and Presentation

Mode-AL designs and manufactures Lecterns for meeting room and auditoria applications. We are proud of our stunning range, all of which can be configured to any size and specification. With the addition of accessories and a corporate or university logo, these are ideal for lecture halls, meeting rooms, restaurants, conference centres and auditoria.

We also offer a full bespoke service on all lecterns. This can either be customising any of our standard range or, working with our design engineering team, create your own design.

# Lecterns - Standard Range

The Mode-AL range starts with the basic 600mm wide lectern, comprising a glass top shelf. Made to order, the column, top sections and base are manufactured from extruded aviation grade aluminium and come in four standard widths:

- 600mm (Slim)
- 800mm (Medium)
- 1200mm (wide)
- 1800mm (Wide Presentation desk)

## Specification

- 600mm standard width
- Universal shock mount
- 2 x cable access on top
- Standard glass top shelf (options of smoked, frosted or Trespa)
- Cable management through the upright
- Levelling feet (castors can be supplied at extra cost)
- Grey front panel (various finish options available at extra cost)

# Lecterns - Standard Range

Below are various examples of our standard Lecterns

## L-600-01

Standard 600mm Lectern with:

- Cable Management in column
- Mounting for Microphone

## L-800-03

- Additional ES-01 Glass Shelf
- Power & Data distribution panel

## L-1200-01

Standard 1200mm wide format Lectern with:

- Power & Data Distribution on top shelf
- 3 x Power outlets
- Microphone Mount
- Cable Access Port
- Castors/Levelling feet

## L-1200-02

Standard 1200mm wide format Lectern with:

- Power & Data Distribution on top shelf
- 3 x Power outlets
- Microphone Mount
- Cable Access Port
- Castors/Levelling feet
- ES-01 Glass shelf in frosted finish

# Lectern - Bespoke Design Service

Mode-AL offers a bespoke service on our complete range of lecterns. This starts by customising any product in the standard range. Alternatively, you can start with a fresh sheet of paper, and create you own unique design.

- **Control surface (boat).** We can integrate touch panels, cable cubbies, patch panels and a whole host of other items into our control surfaces to give that built in look.
- **Shield and modesty panel graphic and custom finishes.** The application of custom graphics and finishes to our lectern shields and modesty panels is the easiest way to make the lectern work with the existing décor within the room, re-affirming the corporate identity.

# Lectern - Bespoke Design Service (Cont.)

- **Height adjustable lecterns.** Offered across the complete range. Lecterns can be converted to height adjustable to meet with DDA access requirements. We can also offer screen lifters and motorised expanding shelves.
- **19" racking.** Three standard depths are available - 400, 600 and 800mm deep plus any height up to 42u. All racks have the option of soundproofing and cooling packs for more demanding applications.
- **Accessories:** We can offer accessories such as equipment cabinets, additional shelves, task lights, microphones and plasma screens.

# Presentation Desk - LD1800

The LD1800 is an 1800mm wide Presentation Desk/Lectern and is the largest in the Mode-AL range. After increasing requirements for larger lecterns than the standard 600mm, 800mm and 1200mm sizes, we introduced this range in 2012 to fulfil an expanding education requirement. Since then, it has become a fixture in many lecture halls worldwide.

With a generous work surface area and up to 15U\* of rack space available, the L-1800 can accommodate the most diverse of presentations. Designed with customisation in mind, this lectern can be configured to suit bespoke requirements, with equipment integration at the top, providing an uncluttered working environment for its users.

The 19" rack cabinet has a toughened locking glass door to the rear. Access to the back of the rack is achieved by the removal of the shield, providing a secure and tamper proof cover. Optional soundproofing and fan kits are available for the rack.

Like the Lecterns, we can also incorporate the logo onto the front panel.

## Options :

- 13, 14 or 15u racks available
- Custom control surface
- Height adjustable (motorised)
- Finish options for work top
- Finish options for shield and modesty panel
- Finish option for 19" rack
- Rack can be specified left or right hand side (as shown)
- Castors or levelling feet

# Other presentation

Below are various examples commissioned orders for Corporate and Leisure sectors.

**Audi**  
Interactive display stand  
with integrated touch screen  
display and keyboard.  
Installed at Audi HQ in  
Woking

**Digital Signage**  
Nine exhibition screens shaped  
to resemble half a football for  
the Fifa World Cup, 2010.

**Interactive Kiosk**  
Height Adjustable kiosk  
Interactive kiosk for Learning  
Centre.

**Smartboard Stands**  
Installed in classrooms /  
corporate meeting rooms and  
configured according to client's  
specifications

## ABOUT US

Mode-AL Display Engineering is the leader in the design and manufacture of multiple monitor mounting solutions for Industrial Process Control digital signage, Broadcast collaborative systems, and high-end AV.

Being acknowledged as the originator of the first Flat Screen Monitor Stacks, has enabled Mode-AL to develop an enviable, global client base of broadcasters, system integrators and end-user clients such as, BBC, ITV, TV2A, ESPN, Sky, Sony, Panasonic, Fujitsu, Morgan Stanley, Price Waterhouse Coopers, Honda, Aviva, Mercedes, Siemens, HM government and many more.

We seamlessly integrate our unique structures with technology by offering a turn-key solution of consultation, design, manufacture and installation. Many projects also involve liaison with designers and construction contractors during a build or refurbishment.

Mode-AL offers a unique approach - we design for life. Whether ergonomically or chronologically, our products are designed to outperform and outlast those of our competitors, with the added advantage that when end of life is reached, the units can either be re-tasked with additional components or they can be 100% recycled.
